Summary

Software Engineer with a B.Tech in Information Technology and hands on experience in Python, Java, application debugging, backend development, and software testing. Experienced in investigating workflow issues, maintaining application services, working with databases, and collaborating through code reviews and Agile development. Interested in system behaviour, performance analysis, reliable software, and developing solutions through data driven problem-solving.

Skills

Languages: JavaScript, Python, Java, TypeScript
Software Engineering: Object-Oriented Programming, REST APIs, Application Debugging, Troubleshooting, Software Testing, Code Reviews, Git
Databases: PostgreSQL, MongoDB, SQLAlchemy, Alembic
Backend Technologies: FastAPI, Node.js, Express.js, Pydantic
Tools: Git, GitHub, Visual Studio Code, IntelliJ IDEA
Additional Technologies: LangGraph, LangChain, React.js, React Native

Work Experience

CloudLex Aug 2026 – Present
AI Engineer Intern

- Investigate and resolve workflow issues involving tool orchestration and application state management.
- Debug and maintain Python backend services built with FastAPI and LLM integrations.
- Work with PostgreSQL, SQLAlchemy, and Alembic to maintain database operations and schema migrations.
- Troubleshoot document-processing and RAG workflows to improve application reliability.

DoaGuru Feb 2026 - Aug 2026
Full Stack Developer

- Developed and deployed an AI-based doctor application used by 100+ users, according to the existing resume.
- Implemented core application features, including symptom analysis, chatbot interaction, and report generation.
- Managed 5+ updates, handled 20+ test cases, and improved performance by 40% using optimized workflows.

Isaii Ai June 2025 - Oct 2025
MERN Stack & React Native Developer

- Built 3+ full-stack web and mobile applications using MERN Stack and React Native, supporting 500+ active users.
- Developed 20+ RESTful APIs with complete CRUD operations and delivered 10+ production-ready modules.
- Worked in Agile (2-week sprints), conducted 15+ code reviews, and created 20+ pages of technical documentation.

Jabalpur Engineering College May 2024 - May 2026
Full Stack Web Developer

- Designed and developed a centralized scholarship portal using MERN stack, automating workflows for 3+ departments and reducing manual effort by 60%.
- Built a real-time tracking system with REST APIs, improving request visibility for 200+ students.

Project Work

Webly-AI (AI-Powered Website Builder) **Link**
Tech Stack: React, Vite, WebContainer, Gemini API, Redux Toolkit, TailwindCSS

- Built an AI-powered website generator that converts user prompts into complete React applications with automated project structure.
- Implemented live preview, runtime error detection, and ZIP export, reducing manual setup effort by ~70%.
- Integrated Gemini API for intelligent code generation and dynamic UI creation.

PixelPrompt (Sketch-to-Code AI Website Generator) **Link**
Tech Stack: React, Node.js, Express.js, OpenAI API, TailwindCSS, WebContainer, Excalidraw

- Developed an AI-driven system that converts hand-drawn UI sketches and images into fully responsive websites.
- Implemented image upload, instant code generation, live preview, and downloadable builds.
- Tested across 100+ inputs to ensure layout accuracy, responsiveness, and cross-browser compatibility.

Education

B.Tech (Information Technology) , Jabalpur Engineering College, Jabalpur | 2022–2026
Class 12th: 75.5% | Class 10th: 77% , Stemfield International School, Jabalpur

Awards and Certificates

- Completed Agile Project Management (HP) and Full Stack Web Development (Udemy) certifications.
- DSA question solved
- Active GitHub contributor (50+ commits) with consistent problem-solving practice.
